AI Tools: Claude.ai, ChatGPT API, GitHub Copilot

Tools & Cloud: AWS, Git, GitHub, VS Code

Soft Skills: Problem-Solving, Team Collaboration

PROFESSIONAL EXPERIENCE

Freelancer (Self employed) Nov 2025 – Present

Software Engineer | Remote

Techerudite Pvt. Ltd. Apr 2025 – Sep 2025

Software Engineer | Ahmedabad

Acquaint Softtech Pvt. Ltd. Feb 2024 – Mar 2025

Software Engineer | Ahmedabad

Tristate Technology LLP. Jan 2022 – Feb 2024

Software Engineer | Ahmedabad

KEY PROJECTS

Faces Consent – Digital Healthcare Platform

Tech Stack: React.js, Redux Toolkit, Tailwind CSS, PostgreSQL

- All-in-one digital platform for aesthetic and beauty professionals with consent forms, bookings, prescriptions, and appointments.
- Single reusable component architecture dynamically rendering role-specific dashboards for Practitioners, Prescribers, and Pharmacies.
- AI-powered client and product summaries generated from consent forms, medical records, and prescription data.

Enseedling – Job Portal & E-Learning Platform

Tech Stack: Next.js, Node.js, Express.js, Zustand, Sequelize, PostgreSQL, Tailwind CSS

- Full-stack platform connecting job seekers, employers, and educators with secure role-based access and personalized experiences.
- Features include job listings, candidate applications, and educator tutorial uploads for professional skill development.

Hasmitan & Architects – Portfolio Website

Tech Stack: Vite framework, Tailwind CSS

- Marketing and portfolio website for hasmitandarchitects with SEO optimization and responsive design for lead generation.

E commerce – Abaya Fashion

Tech Stack: React.js, Node.js, Tailwind CSS, PostgreSQL

Full-featured online clothing store for a Dubai-based client with product filters, cart, wishlist, checkout, payment integration.

Lifecell CRM – Field Sales Management

Tech Stack: Next.js, Redux Toolkit, Tailwind CSS

- CRM solution for India's first and largest stem cell bank to manage nationwide field sales processes and customer data.
- Real-time dashboards for sales tracking, customer management, and performance reporting.

MyWord – Multiplayer Word Guessing Game

Tech Stack: React.js, Node.js, WebSockets

- Competitive two-player game where opponents deduce each other's secret word using logical reasoning and progressive clues.
- Three game modes: vs. Stranger/Friend (live matchmaking), vs. AI Bot, and Solo challenge — catering to all player preferences.
- Real-time game state management with turn-based logic, winner detection, and replay support.

EDUCATION

Master of Computer Applications (MCA)*Jul 2020 – May 2022*

Sardar Patel University | Anand, Gujarat

B.Sc. Computer Science*Jul 2017 – May 2020*

Veer Narmad South Gujarat University | Valsad, Gujarat
